primary-progressive multiple sclerosis - MS Society of Canada

Progressive MS. The term progressive MS includes secondary-progressive, primary-progressive and progressive-relapsing MS. Secondary-progressive MS follows a diagnosis of relapsing-remitting, where over time, distinct relapses and remissions become less apparent

and the disease begins to progress steadily, sometimes with plateaus.

Primary Progressive MS: Symptoms, Causes and Treatment

Multiple sclerosis (MS) is a chronic disease that affects the central nervous system. Nerves are coated in a protective layer called myelin, which speeds up the transmission of nerve signals.

Primary progressive MS (PPMS) : National Multiple ...

Disease activity and progression should be evaluated at least yearly by neurologic examination and MRI. Being able to characterize the course of your disease course at different points in time helps you and your MS care provider have important conversations about your treatment options and prognosis.

Primary Progressive Multiple Sclerosis | SpringerLink

Why do researchers exclude patients with primary progressive multiple sclerosis from enrolling in clinical trials? Please let me know if you hear of studies that I might be allowed to enter or treatments that I could try for my condition." Thus, in recent years, the sad lament of the patient with primary progressive MS (PPMS). This variant, often in the guise of a chronic progressive
