A review of studies on the cross-cultural generalizability of the Big-Five and the F.F.M. of personality describes the convergent and divergent results of two main research traditions ("emic" and

The Five-Factor Model across cultures Is it universal?

McCrae himself was initially astounded that a number of studies showed the factor structure of the NEO-PI-R replicated almost perfectly across cultures (McCrae, 2002), although he goes on to state I have come to expect that all basic features of trait psychology are universal (McCrae, 2002: Sect. About the Author). This is not surprising given that overall, studies of the factor structure of the NEO-PI-R in 40 languages/dialects from over 30 cultures have found at
